# Kerala University of Health Sciences Thrissur 680596

**SYLLABUS** 

**POST BASIC B.Sc NURSING** 

[PB B.Sc. Nursing]

**Course Code 007** 

2016-17 admission onwards
(Approved by the Academic Council)

(This is excerpted from the draft Regulations document being prepared by the KUHS. Hence the numbering pattern is being retained)

#### 2. COURSE CONTENT

#### 2.1 Title of course:

POST BASIC B.Sc NURSING – Abbreviated as PBB.Sc Nursing

#### 2.2 Objectives of course

#### AIM

The aim of the Post Basic BSc. Nursing programme is to:

1. Prepare graduates to assume responsibilities as competent nurses and midwives in providing promotive, preventive, curative and rehabilitative services who can make independent decisions in nursing situations and conduct research studies, in the areas of nursing practice and assume the role of teacher, supervisor, and manager in a clinical/ community health setting/ institutions of nursing education.

#### **Objectives**

On completion of the Two Year Post Basic B.Sc Nursing programme, the graduate will be able to

- 1. Apply knowledge from physical, biological and behavioral sciences, medical including alternative systems and nursing in providing nursing care to individuals, families and communities.
- 2. Demonstrate understanding of life style and other factors, which affect the health of individuals and groups.
- 3. Provide nursing care based on nursing process.
- 4. Demonstrate critical thinking skills in making decisions in all situations in order to provide quality care.
- 5. Utilize the latest trends and technology in providing health care.

- 6. Provide promotive, preventive, and restorative health services in line with the National Health Policies and programmes.
- 7. Practice within the framework of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.
- 8. Communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationships and team work.
- 9. Demonstrate skills in teaching to individuals and groups in clinical/communities health settings/ Institutions of Nursing education.
- 10. Participate effectively as members of the health team in the health care delivery system.
- 11. Demonstrate leadership and managerial skills in clinical/community health settings.
- 12. Conduct need based research studies in various settings and utilize the research findings to improve the quality of care.

#### 2.3 Medium of instruction:

Medium of instruction shall be English

#### 2.4 Course outline

# **Courses of Study**

**First Year** 

	1st Year	Theory hours	Practical hours
1.	Microbiology	60	30
2.	Nutrition & Dietetics	30	15
3.	Biochemistry & Biophysics	60(30+30)	Nil
4.	Psychology	60	15
5.	Nursing Foundation	60	65
6.	Maternal Nursing	60	280

7.	Child Health Nursing	60 280			
8.	Advanced Medical & Surgical Nursing	90	400		
9.	English (Qualifying)	50	Nil		
	Total	530	1085		
	Library / Self study	4	5		
	Co curricular activities	2	0		
	Grand Total	16	80		

2 <sup>nd</sup> Year	Theory hours	Practical hours	
1. Sociology	60	Nil	
2. Community Health Nursing	60	400	
3. Mental Health Nursing	60	400	
4. Introduction to Nursing Education	60	140	
5. Introduction to Nursing Administration	60	220	
6. Introduction to Nursing Research & Statistics	50(35+15)	120	
Total	350	1280	
Library / Self study	3!	5	
Co curricular activities	15		
Grand Total	1680		

Teaching of Anatomy, Physiology, Pharmacology and Pathology shall be integrated with clinical subjects.

#### 2.5 Duration

The maximum period to complete the course successfully shall not exceed 4 years (double the duration of course)

# 2.6 Syllabus

#### **MICROBIOLOGY**

Placement: First Year Time Allotted: Theory- 60hrs

Practical -30 hrs.

#### **COURSE DESCRIPTION**

This course is designed to reorient the students to the fundamentals of Microbiology and its various sub- divisions. It provides opportunities to gain skill in handling and use of microscope for identifying various micro-organisms. It also provides opportunities for safe handling of materials containing harmful bacteria and methods of destroying micro organisms.

/ L						
	Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
		5	Explain the basics of micro organ isms, microscope and common examinations	Structure and Classification of Microbes,  • Morphological types  • Size and form of bacteria.  • Motility  • Classification of Microorganisms.  Practical: -Use and care of micro scope.  -Common examination: Smear, Blood, Yeasts.	Lecture Discussion Demonstration clinical practice	Short answer Objective type

П	6	Identify the micro	Identification of Micro- organisms.		
		organisms	Discussion of laboratory	Lecture	Essay Short
		using	methods.	Discussion	answer
		Laboratory	<ul> <li>Diagnosis of bacterial</li> </ul>	Demonstration	Objective
		methods	diseases.	clinical practice	type
			Practical: -Staining		
			techniques-gram staining,		
			acid fast staining.		
			-Hanging drop preparation.		
			and a sprachage		

III	6	Describe the growth and nutrition of microbes	Growth and Nutrition of Microbes  Temperature  Moisture  Blood  Practical: -Preparation of Media and culture techniquesCollection, handling and transportation of various specimens.	Lecture Discussion Demonstration clinical practice	Short answer Objective type
IV	10	Discuss the methods of destruction of micro organisms	Destruction of Microorganisms.  • Sterilization and disinfection  • Chemotherapy and antibiotics  • Effects of heat and cold  • Hospital Infection control procedure & role of nurses.  Practical: -Sterilization methods-physical. Chemical and Mechanical	Lecture Discussion Demonstration clinical practice	Essay Short answer Objective type
v	10	Identify the disease producing	Disease producing microorganisms.  • Gram positive bacilli	Lecture Discussion Demonstration clinical practice	Essay Short answer Objective type

		micro organisms	<ul> <li>Tuberculosis and Leprosy</li> <li>Anaerobes</li> <li>Cocci</li> <li>Spirochete</li> <li>Rickettsiae</li> <li>Practical: -Identification and study of the following bacteria: Streptococci, pneumococci and Staphylococci, Corynebacteria, Spirochetes and gonococci. Enteric bacteria. Posting in infection control department.</li> </ul>		
VI	3	Explain about the pathogenic Fungi	Pathogenic Fungi  Dermatophytes  Systemic Mycotic infection  Laboratory diagnosis of mycotic infection	Lecture Discussion Demonstration clinical practice	Short answer Objective type
VII	5	Describe the concept of immunoprop hylaxis	Immunity  Immunity and hypersensitivity -Skin test  Antigen and antibody reaction  Immunization in disease. Practical:Demonstration of serological methods.	Lecture Discussion Demonstration clinical practice	Essay Short answer Objective type

VIII	10	Explain about parasites and vectors	Parasites and Vectors  Characteristics and classification of parasites Protozoal infection including amoebiasis Helminthes infection Diagnosis of parasitic infection Vectors and diseases transmitted by them Practical: Identification of Parasites and Vectors	Lecture Discussion Demonstration clinical practice	Essay Short answer Objective type
IX	3	Discuss viruses and the diseases caused by it	<ul> <li>Viruses</li> <li>Classification and general character of viruses</li> <li>Diseases caused by viruses in man and animal and their control</li> </ul>	Lecture Discussion	Essay Short answer Objective type
X	2	Describe about micro organisms transmitted through food	Micro-organisms transmitted through food  • Food poisoning, Food borne infections	Lecture Discussion	Short answer Objective type

# **PRACTICAL: -30 hours**

Each student will practice in the laboratory as indicated in each unit of the course outline. While giving nursing care in the wards they will practice collection and processing of specimens, prevention and control of hospital infections, sterilization, immunization, chemotherapy and maintenance of personal and environmental hygiene. Observation of incinerator, posting in CSSD and infection control department.

# **NUTRITION AND DIETETICS**

Placement: First year Time Allotted: Theory-30Hrs.

Practical-15Hrs

#### **COURSE DESCRIPTION**

This course is designed to provide the students with a wide knowledge of nutrition and dietetics in Indian setting, so that the practice of teaching optimum and realistic dietary planning can become an integral part of nursing practice.

Unit	Time	Learning	Content	Teaching learning	Assessment
		Objective		activities	method

4	Explain the principles and practices of nutrition and dietetics	Introduction to nutrition and dietetics.  Balanced diet, factors on which it depends.  Factors to be considered in planning.  Guidelines available for planning.  Food Hygiene, preparation and preservation.  Review of nutrients - micro & macro.  Introduction to diet therapy.  Routine hospital diets.	Lecture Discussion	Short answer Essay Objective type
6	Plan therapeuti c diets in different settings	Therapeutic diet under each unit i.e. Cardiovascular diseases, Gastrointestinal diseases, Renal disorders, Endocrine and metabolic disorders, Allergy, Infections and fevers, Pre and post operative stage, Deficiency	Lecture discussion Demonstration Practice session	Short answer objective type

			diseases and

IV	10	Identify nutritional needs of different age groups and plan diet accordingly	Nutritional needs for special groups: infant, child, adolescent, pregnant woman, lactating mother and old people.  • Substitutes for non-vegetarian foods.  • Selection of cheap and nutritious foods. Nutrition education - needs and methods.  • Methods of assessing nutritional status of individual/	Lecture discussion Demonstration Practice session Supervised clinical practice	Short answer objective type
			<ul><li>group/ community.</li><li>Current nutritional problems and national programmes</li></ul>		

PRACTICAL – 15 Hours

Objective : Prepare meals using different methods utilizing cookery rules

- I. Methods of cooking and cookery rules.
  - 1. Simple preparation of beverages, soups, cereals and pulses, eggs, vegetables, meat.
  - 2. Menu plans.
- II. Preparation of supplementary food for infants.
  - 1. Food for toddlers
  - 2. Low cost nutritious dishes for vulnerable groups.
  - Dietary case study of patient on special diet and planning of low cost dietary instructions for home adaptations
  - 4. Planning of therapeutic diets.

# **BIOCHEMISTRY AND BIOPHYSICS**

Placement: First year Time Allotted:

Section A (Biochemistry) - Theory -30 hrs

Section B (Biophysics) - Theory -30 hrs

# **COURSE DESCRIPTION**

This course introduces the basic principles of Biochemistry and Biophysics related to nursing.

# **Section A: Biochemistry**

Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
I	3	Describe the importance of biochemistry in nursing	<ul> <li>Introduction:</li> <li>Importance of</li> <li>Biochemistry in nursing.</li> <li>Study of cell and its various components</li> </ul>	Lecture discussion using charts, slides	Short answer objective type
II	4	Explain about fluid and electrolyte balance of the body	Water and Electrolytes; Water- Sources, property & functions in human body.  • Water and fluid balance.  • Electrolytes of human body, functions, sources.	Lecture discussion	Short answer objective type
III	5	Discuss about clinical enzymology	Enzymes -Mechanism of action  -Factors affecting enzymes activity	Lecture discussion Practice session	Essay Short answer objective type

			Diagnostic applications		
			-Precautions for handling		
			specimens for enzyme		
			estimation		
			Digestion and		
			absorption of		
			carbohydrates, proteins		
			and fats.		
			Various factors		
			influencing the digestion		
			and absorption, mal -		
			absorption syndrome.		
IV	6		Carbohydrates; Catabolism of	Lecture	Essay
		Explain the	carbohydrates for energy	discussion	Short answer
		metabolism of	purposes	using charts,	objective
		carbohydrate		slides	type
			<ul> <li>Mitochondrial oxidation and oxidation</li> </ul>	Practice	
			phosphorylation.	session	
			• Fats of glucose in the		
			body. Storage of glucose in the body, glucogenesis		
			and neoglucogenesis,		
			blood glucose and its		
			regulation.		
			Glucose tolerance test,		
			hyperglycemia,		
			hypoglycemia, glycemia		

V 6	Explain the metabolism of Aminoacids and proteins	<ul> <li>Protein: Amino acids, hormones.</li> <li>Essential amino acids. Biosynthesis of protein in the cells.</li> <li>Role of nucleic acid in protein synthesis.</li> <li>Nitrogenous constituents of Urine, Blood, their origin - urea cycle, uric acid formation, gout</li> <li>Plasma proteins and their functions.</li> </ul>	Lecture discussion using charts, slides Practice session	Essay Short answer objective type
VI 6	Explain the metabolism of Lipids	Fat: Biosynthesis of fats and storage of fats in the body.  • Role of liver in fat metabolism  • Biological importance of important lipids and their functions.  • Cholesterol and lipoprotein  -sources, occurrence and distribution  -blood level and metabolism  -ketone bodies and utilization  • Inter-relationships in metabolism and cellular control of metabolic process	Lecture discussion using charts, slides Practice session	Essay Short answer objective type

**Section B: Biophysics** 

Theory – 30 hours

#### **COURSE CONTENTS**

Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
	1	Explain the basic concepts of biophysics	Introduction: Concepts of unit and measurements.  • Fundamentals and derived units.  • Units of length, weight, mass, time.	Lecture Discussion	Short notes objective type
II	1	Describe about the Vector and scalar motion, speed, velocity and acceleration	Vector and scalar motion, speed, velocity and acceleration	Lecture	Short notes

III	2	Discuss about gravity and its principles	Gravity: Specific gravity, centre of gravity, principles of gravity.  • Effects of gravitational forces on human body.  • Application of principles of gravity in nursing.  • Force, work, Energy: Their units of measurement.  • Type and transformation of energy, forces of the body, static forces.	Lecture Discussion Demonstratio n seminar Practice session	Essay short notes objective type
IV	2	Explain about the force and energy of the body	Principles of machines, friction and body mechanics.  • Simple mechanics – Lever and body mechanics, pulley and traction, incline plane, screw.  • Application to these principles in nursing.	Lecture Discussion Demonstratio n seminar Practice session	Essay short notes objective type
V	3	Describe about heat the effects use and principles	Heat: Nature, measurement, transfer of heat.  • Effects of heat on matter.  • Temperature scales.  • Regulation of body temperature  • Use of heat for sterilization  • Application of these principles	Lecture Discussion Demonstratio n seminar Practice session	Essay short notes objective type

			in nursing		
VI	3	Discuss about Light and laws of reflection	Light : Laws of reflection	Lecture Discussion	Essay short notes objective
		or renession	<ul> <li>Focussing elements of the eye, defective vision and its correction, use of lenses.</li> </ul>	n Practice session	type
			correction, use of lenses.		
VII	4	Explain about pressure and its types	Relationship between energy, frequency and wavelength of light	Lecture Discussion Demonstratio	Essay short notes objective
			Biological effects of light	n Practice session	type
			Use of light in therapy	Supervised clinical	
			<ul> <li>Application of these principles in nursing.</li> </ul>	practice	
			Pressures : Atmospheric		
VIII	3	Describe about Sound and its principles	pressure, hydrostatic pressure, osmotic pressure.	Lecture Discussion Demonstratio	Essay short notes objective
			Measurements of pressures in the body	n	type
			-Arterial and venous	seminar	
			blood pressures	Practice session	
			-Ocular pressure		
			-Intracranial pressure		

			-Applications of these principles in nursing		
			Sound : Frequency, Velocity and Intensity		
			Vocalization and hearing		
			Use of ultrasound. Noise pollution and its prevention		
			Application of these principles in nursing.		
IX	5	Discuss the principles of electricity and uses in medical field	Electricity and Electromagnetism : Nature of	Lecture Discussion Demonstration	Essay short notes objective
		licid	Electricity. Voltage, Current, Resistance ant their Units	Practice session	type
			• Flow of electricity in solids, electrolytes, gases and vacuum.	Supervised clinical practice	
			Electricity and human body.	P 13333	
			• ECG, EEG, EMG, ECT		
			Pace makers and defibrillation		
			Magnetism and electricity		
			M.R.I. Scanning, CAT Scan		
Х	3	Explain about atomic energy	Aboutin Funday City is	Lecture	Essay short
		and its uses	Atomic Energy: Structure of Atom, Isotopes and Isobars.	Discussion Demonstration	objective type
			Radioactivity : Use of	Practice	,

			radioactive isotopes.  • Radiation protection units	session	
			and limits,		
XI		Describe about			Essay short
		the principles of	Principles of Electronics :	Lecture	notes
	3	electronics	Common electronic	Discussion	objective
			equipments used In patient	Demonstration	type
			care.		
				Supervised	
			Biological effects of	clinical	
			Radiation.	practice	
			Basic principles of radiation		
			protection safety.

#### **PSYCHOLOGY**

Placement: First Year Time Allotted: Theory-60 hrs

Practical - 15 Hrs

#### **COURSE DESCRIPTION**

This course is designed to reorient and widen the student's knowledge of fundamentals of psychology. The student is offered an opportunity to apply the theoretical concepts in the clinical setting and thereby understand the psychodynamics of patient behavior. This course clinical setting and thereby understand the psychodynamics of patient would also help the student to develop an insight into her own behavior.

Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
ı	2	Define psychology its scope and methods	Introduction: Definition of psychology, scope and methods of psychology  • Relationship with other subjects	Lecture Discussion	Short answer objective type
II	6	Describe about sensory process and perception	Sensation, Attention and Perception; Definitions  • Sensory processes; Normal and abnormal Psychology  • Attention and distraction: contributory factors.  • Characteristics of perception, Perception; normal and abnormal	Lecture Discussion Case discussion	Essay Short answer objective type

III	5	Explain motivation frustration conflicts and self actualization	Motivation; Definition and nature of motivation  • Biological and social motives  • Frustration and conflicts  • Self-actualization	Lecture Discussion Role play	Short answer objective type
IV	3	Discuss about Emotions	Emotions: Definition of emotions, Expression and perception  • Emotions in sickness	Lecture Discussion Demonstration	Essay Short answer objective type
V	4	Describe about Personality	Personality: Definition, Constituents of personality  • Personality in sickness and nursing	Lecture Discussion Role play	Essay Short answer
VI	8	Explain about the psychological aspects of nursing	Psychological aspects of nursing  • Behavior and sickness. Psychological needs of  -Child and	Lecture Discussion Case discussion Role play	Essay Short answer objective type

# **NURSING FOUNDATION**

Placement: First Year Time Allotted: Theory – 60 Hrs
Practical – 65 Hrs

# **COURSE DESCRIPTION**

This course will help students to develop an understanding of nursing as a profession, the philosophy, objectives, theories and process of nursing in various clinical settings. The purpose of the course is to orient to the current concepts involved in the practice of nursing and developments in the nursing profession.

Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
	12	Identify the professional aspects of nursing	Development of nursing as a profession -philosophy -objectives and responsibilities of a graduate nurse • Trends influencing nursing practice • Expanded and extended role of the nurse • Development of nursing education in India and trends in Nursing Education • Professional organizations, career planning • Code of ethics & professional conduct for nurses.	Lecture Discussion	Essay Short answer Objective Type
II	8	Explain the ethical concepts of health, illness and developme ntal stages of individual.	Ethical, legal and other issues in nursing  Concepts of health and illness, effects on the person  Stress and adaptation.  Health care concepts and nursing care concepts  Development concept, needs, roles and problems of the development stages of individual – newborn, infant, toddler, preadolescent, adolescent, adulthood, middle-age, old age	Lecture Discussion Explain using charts, graphs, models, films, slides,	Structured essay, Short notes Very short notes

	15	Explain theories of nursing	Theories of nursing practice:  Maslow's hierarchy of needs  Meta paradigm of nursing - characterized by four central concepts i.e. nurse, person (client/patient), health and environment. Introduction to theories in Nursing:Florence Nightingale environmental theory -Orem's theory of self care, Roy's adaptation model, Peplau's theory of interpersonal relationship, Betty Neuman's system model	Lecture Discussion/ seminar	Structured essay, Short notes
IV	12	Utilize steps of nursing process	Nursing process.  • Assessment: Tools for assessment, methods, recording.  • Planning: Techniques for planning care, types of care plans.  • Implementation: Different approaches to care, organizations and implementation of care, recording.  • Evaluation: Tools for evaluation, process of evaluation	Lecture Discussion/ seminar Practice session Supervised clinical practice	Structured essay, Short notes Very short notes
V	6	Appreciate the significance of quality assurance and role of nurse in various levels of health services	Quality assurance: nursing standards, nursing audit, total quality management • Role of council and professional bodies in maintenance of standards	Lecture discussion / seminar	Essay Short answer Objective Type

VI	7		Primary health care concept	Lecture	Structured
		Explain the	-Community oriented nursing	Discussion/	essay,
		current	-Holistic nursing	seminar	Short notes
		trends and	-Primary nursing	Practice	Very short
		concepts in	<ul> <li>Family oriented nursing concept</li> </ul>	session	notes
		health and	-problem oriented nursing	Supervised	
		nursing	-progressive patient care	clinical	
			-team nursing	practice

## ADVANCED MEDICAL AND SURGICAL NURSING

Placement: First year Time allotted: Theory – 90hrs
Practical – 400hrs

#### COURSE DESCRIPTION

The purpose of this course is to widen the student's knowledge and develop proficiency in caring for patients with medical surgical problems. This course includes review of relevant anatomy and physiology, pathophysiology in medical- surgical disorders and the nursing

management of these conditions.

# **ENGLISH**

**Placement: First Year** 

**Time Allotted: Theory - 50hrs** 

# **COURSE DESCRIPTION**

This course is designed to help the student to understand the usage of English language

required for their professional work.

required	ן ווטו נוופוו ן	professional work	•		
Unit	Time	Learning Objective	Content	Teaching learning activities	Assessment method
I	14	Speak and write grammatically correct English	Remedial study of Grammar  • Review of grammar, vocabulary and effective use of dictionary • Prepare task oriented seminars. • Symposia and panel discussion.	Lecture Discussion Demonstrate use of dictionary Exercise on use of Grammar Practice in public speaking	Objective type Fill in the blanks Para phrasing
II	12	Develop ability to read understand and express meaningfully the prescribed text	The ability to understand selected passage and express meaning in one's own words Reading and comprehension of the prescribed books.	Exercise on Reading Summarizing Comprehension	Short answer Essay type

III	12	Develop writing skills	The study of various forms of composition  -Note taking  -Dairy  -Nurses notes, anecdotal records  -Writing of summary  -Nurses reports on health problems  The student will submit one sample of each item from her on practical experience	Exercise on writing Letter writing Nurses notes Precis Diary Anecdote Health problems Story writing Resume/CV Essay writing Discussion on Written	Assessment of skills based on checklist
IV	12	Develop skill in verbal communication and listening comprehension	Verbal communication Oral reports. Summarization of discussion Debate Listening comprehension - Film, Cassette and Radio.	Exercise on Debating Practice verbal communication Listening to cassette, radio and films	Assessment of skills based on checklist

#### PRACTICUM

The clinical experience in the wards and bed side nursing will provide opportunity for students to fulfill the objectives of learning language

Assignment on writing and conversation through participation in discussion, debates, seminars and symposia. The students will gain further skills in task oriented communication

## 2.7 Total number of hours

Duration of the course shall be two years.

Duration of course	Weeks
Weeks available per year	52 weeks
Total Vacation =	6 weeks
a). Festival Holidays	2 weeks
b). Public holidays	3 weeks
c). After University theory exam	1 week
Examination including preparatory holidays	2+2 weeks
Available weeks =	42 weeks
Hours per week =	40 hours
Hours available per academic year =	1680(42wks x 40hrs)

## 2.8 Branches if any with definition

Not Applicable

# 2.9 Teaching learning methods

As given under 2.6- Syllabus.

# 2.10 Content of each subject in each year

As given under 2.6- Syllabus.

# 2.11 No: of hours per subject (lecture-tutorial-seminar-group discussion)

As given under 2.6- Syllabus.

## 2.12 Practical training.

As given under 2.6- Syllabus.

#### 2.13 Records

Proper records of practical work should be meticulously maintained.

## 2.14. Dissertation

Not Applicable

# 2.15. Specialty training if any

Not Applicable

# 2.16. Project work to be done if any

Clinical Assignments & projects work as given under 2.6- Syllabus.

# 2.17. Any other requirements [CME, Paper Publishing etc.]

Not applicable.

# 2.18. Prescribed/recommended textbooks for each subject

As given under 2.6- Syllabus.

## 2.19. Reference books

As given under 2.6- Syllabus.

## 2.20. Journals

As given under 2.6- Syllabus.

# 2.21. Logbook

A logbook should be maintained
